

General Instructions for submitting the camera-ready paper for the 17th ASONAM 2025 and Collocated Events

In 2025 ASONAM edition, Springer-Nature will handle the proceedings and as a result, different instructions than the previous years should be taken into consideration for the preparation and submission of the camera ready files (pdf and source files) and the copyright form.

Preparations

You must revise your paper by carefully considering all comments from the reviewers. Please remember the following before preparing your camera-ready version of your paper:

- 15 pages for Long papers (includes References and Appendices).
- 8 pages for Short papers (includes References and Appendices).
- The maximum extra-pages allowed are 2 for Long papers, and 2 for Short papers.
- Note that if you need extra-pages, this should be decided at registration time.

The camera-ready must be prepared in Springer format following the next steps.

Step 1: Use Springer-Nature Template for camera ready paper

The Information for Authors of Springer Computer Science Proceedings can be found at: <https://www.springer.com/gp/computer-science/lncs/conference-proceedings-guidelines> where the instructions for proceedings authors and the Word and LaTeX templates are available.
